

HALDIMAND MOTORS SERVICE DEPARTMENT

WHEEL ALIGNMENT & FREE FRONT-END INSPECTION

\$79.95

Why do a Wheel Alignment?

1. Better Gas Mileage

Wheels going straight down the road cuts down rolling resistance.

2. More Mileage Out of Your Tires

A slightly misaligned vehicle can wear tires unevenly, shortening their lifespan.

3. Maintains Tire Warranty

If your tires wear unevenly, many tire manufacturers will not honour their warranty.

4. Less Wear & Tear on Other Parts

If vehicle is misaligned, there can be constant pressure on steering system causing premature wear.

5. Easier to Drive

A properly aligned vehicle eliminates those annoying pulls to one side or the other.
